

Technology Escrow — Attorneys

Protect Your Client's Intellectual Property with Technology Escrow

HELP ENSURE PROPER PROTECTION FOR YOUR CLIENTS

As an attorney representing clients who use or develop technology, you can help ensure proper intellectual property protection by recommending that they leverage Iron Mountain's comprehensive technology escrow services. Widely acknowledged in the legal community as the highest quality in the industry, an Iron Mountain escrow account will significantly reduce your clients' risks when licensing technology.

At Iron Mountain, we take intellectual property management seriously and deliver our services with the integrity you and your clients would expect—and, in fact, demand—from a trusted and neutral third party. We don't just vault technology. We provide complete intellectual property management services.

COMPREHENSIVE ESCROW SERVICES MEET YOUR UNIQUE NEEDS

Whether your client's needs today are for one specific customer, a mission-critical application, or an entire risk management strategy, Iron Mountain provides flexible, comprehensive escrow services. These services generate the type of agreement that gives your client the optimal level of protection in each unique situation.

Iron Mountain's escrow service always includes the key features of technology escrow required by all customers desiring escrow protection. But at the same time, Iron Mountain's escrow service is flexible enough to accommodate additional requirements for custom services.

KEY FEATURES OF IRON MOUNTAIN'S COMPREHENSIVE ESCROW SERVICES INCLUDE:

- Dedicated client managers for your account
- Unlimited deposits
- Electronic vaulting

- Secure, real-time online account management with Iron Mountain Connect™ Escrow Management Center
- Secure destruction of materials upon account closure
- Verification of deposit materials
- Automatic notification of deposits and deposit updates
- Escrow Expert™ consulting services

SECURITY FOR TECHNOLOGY USERS

Technology licensees are dependent on their vendors for support and maintenance of their technology. They are exposed to risks if the vendor goes out of business or stops supporting the technology for other reasons.

An escrow account with Iron Mountain protects licensees by allowing them to gain access to their vendor's source code under specific conditions outlined in the escrow agreement. With an escrow in place, licensees have the opportunity to maintain that technology without vendor support, while planning how to replace it.

While requesting escrow protection is a prudent business practice when licensing any technology of significance, you should seriously consider recommending escrow protection to your clients if:

- The technology is mission-critical
- Many employees will be using the technology
- The technology impacts your clients' customers
- The technology would be difficult or costly to replace
- Third-party software is embedded into the technology
- Client is developing a corporate risk management strategy

PROTECTION FOR TECHNOLOGY DEVELOPERS

Technology developers can appreciate the benefits of technology escrow protection, too.

As a neutral third party, Iron Mountain dates and time-stamps all materials deposited into escrow. This creates an audit trail of the development of technology and provides independent validation of the ownership of the related intellectual property.

Iron Mountain has no vested interest in defending one party over another and, therefore, has the trust of the courts to vouch for the existence and ownership of all types of intellectual property that your clients might want to protect.

A COMPREHENSIVE SERVICE—NOT A COMPLEX SET OF PREPACKAGED AGREEMENTS

As an attorney, your billable time is extremely valuable—as is your need for flexibility in the service you secure on behalf of your customers. Iron Mountain's escrow professionals work with you to define the right level of protection for your client's specific requirements, keeping your time investment under control.

A client who is a technology licensee may require a three-party agreement, signed by the depositor, Iron Mountain and the customer (licensee)—with the intent of easily adding additional technology depositors over time. Alternatively, it may be a two-party agreement, signed by the technology developer (depositor) and Iron Mountain.

THE LEADER IN TECHNOLOGY ESCROW PROTECTION

Iron Mountain has provided unmatched intellectual property protection for high-technology vendors and their clients since 1982. With the industry's highest level of service, it's no wonder that more than three-fourths of the Fortune 500 and 93% of the Software 100 trust Iron Mountain to protect their intellectual property assets.

SAFETY—AND SERVICE—IN NUMBERS

Over 45,000 customers worldwide have stored their mission-critical software and intellectual property in the more than 100 vaults Iron Mountain owns and operates.

Our Technology Escrow teams have managed thousands of successful releases in over 22 years working together, without ever having had a judgment returned against us.

ASSURED PRIVACY AND SECURITY

You can rest easy knowing your data is completely secure and protected. All data is fully backed up to an alternate location in Iron Mountain's own ultraprotective environment, resistant to seismic activity and other natural disasters. Bonded Iron Mountain employees who have undergone extensive background checks run these underground facilities. Two layers of 128-bit encryption and use of Secure Socket Layer technology ensure message integrity and authentication, and a four-level user authority system ensures that each user sees only the data they are entitled to see.
